

# Provibtech Introduction

Please find below the introduction for Provibtech, a machine monitoring company with similar product range as Bentley Nevada. Provibtech is competitor for Bentley Nevada with exactly same product range and specifications.

[www.provibtech.com](http://www.provibtech.com)

We are glad to introduce **ProvibTech Inc.** (Formerly *PredicTech*) as an established manufacturer and supplier for Vibration and Condition Monitoring Equipments, analysis products. We are the service provider for Petro chemical, fertiliser & Power Plants with its headquarter is in Houston, Texas, USA. We provide the industry with a complete range of the vibration monitoring and protection system for critical machines and balance of plant auxiliaries. ProvibTech believes in providing the customers quality products at right value and after sales service is the key to our success and exponential growth. With the aim to provide global service quality locally to our customers in India and south east Asia, ProvibTech has established a full fledged subsidiary office in India, at New Delhi and we strive to provide support and service to our esteem customers like yourself from the inception stage of the project.

ProvibTech's (Formerly PredicTech) product line includes: a new multi-channel 19" rack vibration monitor, vibration sensors, 4-20 mA / Digital vibration transmitters / monitors, proximity probes, hand held vibration meters and vibration data-collectors.

The major applications of the offered range of products are:

- Turbo - supervisory Instrument (TSI) for Predictive maintenance.
- Safety of machines and personnel.
- Vibration, protection & safety Monitoring system

Assisting Operation and Maintenance personnel to make an intelligent and knowledge based decision about machine operation or shut down if required through diagnostic and condition based monitoring data and analysis software.

ProvibTech is ISO9001 accredited and CE certified, also as per the special requirements for petrochemical and fertilizer industry, products suitable for these industry are also available with CSA and ATEX certification for hazardous location installations.

Our team of engineers has vast experience in executing complete turnkey projects. Also our specialists can assist the customer right from the beginning from plant survey and identification of critical machines and also deciding on the right type of transducers and accessories suitable to the machine conditions and environmental conditions. Also our team of specialists can provide technical and commercial optimum solutions for ONLINE and OFFLINE monitoring systems, suitable for condition monitoring of machine.

We have strength of 300 personnel including more than fifty percent Design Engineers and Technical Staff and an

As you may well aware that in process industries and continuous running plants, it has become highly mandatory to assess the health of costly equipments, so as to avoid any unscheduled breakdown. Also in today's' competitive scenario one has to focus on Cost Reduction Tools. With Predictive maintenance using Vibration monitoring, lot of money invested in the inventory of costly spares can be reduced. This further enhances the productivity of the plant.

**Vision of our Company: To experience the joy of advancing and applying technology for the benefit of the Organizations to improve the profitability and machine availability.**

We earnestly hope that you will find the instruments most suitable for your requirement and we take this opportunity to thank you and assure you of our full co-operation and best services at all the times.
